Re: Petition to modify the FM Table of Allotments

Dear Ms. Dortch,

Please find enclosed one original and four copies of a request to add Channel 259 to Silver Springs Shores, FL, as its first local aural service. This request is supported with an attached engineering study.

Please distribute the original and copies to the appropriate parties. If you have any questions, contact me at (205) 328-1544. If you have any questions concerning the engineering portion of this request you may contact my engineer, Barry Magrill, directly at 904 908.0119. Thank you

Respectfully submitted,

Carrie Futera

Re Petition to modify the FM Table of Allotments, Section 73.202(b)

Dear Sirs

I, Carrie Tuteru, respectfully request that the FCC add Channel 259 in Silver Springs Shores, FL, to its Table of Allotments as its first local aural service. The reference coordinates for the allocation site are.

29 degrees 8 minutes 9 seconds North Latitude,
82 degrees 2 minutes 33 seconds West Longitude

These coordinates are based on the North American Datum 1927 (NAD27). This request is supported with an attached engineering study. The Study shows that the allocation point will serve the City of license in its entirety with a seventy dBu signal. It further shows that there are adequate separation distances (based on 47CFR73.207) to the allocation point with the exception of the present WGNE-FM transmitter site.

WGNE (BLH-RB1104MG) is in the process of moving. The Silver Springs Shores allocation is clear of the location referenced in their CP BPH-20030417ABW. The site in Jacksonville will provide a city grade signal over Middleburg with the new antenna located on a tall tower WGNE already owns.

Should this request be granted I will personally apply for it when the window opens.

If you have any questions, contact me at: (205) 328-1544. If you have any questions concerning the engineering portion of this request you may contact my engineer, Barry Magrill, directly at: 904.908 0119. Thank you.

Respectfully,

A handwritten signature in cursive script that reads "Carrie Tutera".

Re: Petition to modify the FM Table of Allotments, Section 73.202(b)

Dear Sirs:

The attached engineering exhibits support a resubmitted request that the FCC add Channel 259 in Silver Springs Shores, FL, to its Table of Allotments as its first local aural service. The initial request was returned since the City of License (Middleburg) reference coordinates, for WGNE, were short spaced with the proposed allocation. The reference coordinates for the allocation site are:

29 degrees 8 minutes 9 seconds North Latitude,
82 degrees 2 minutes 33 seconds West Longitude

These coordinates are based on the North American Datum 1927 (NAD27). This report includes an "Area to Locate" map, a table of local stations affecting the allocation and a map showing the city grade contour from the proposed allocation point. The Study shows that the allocation point will serve the City of license in its entirety with a seventy dBu signal. It further shows that there are adequate separation distances (based on 47CFR73.207) to the allocation point with the exception of the present WGNE-FM transmitter site in Palatka. WGNE was recently issued a construction permit BPH-

20030417ABW that is clear of the proposed Silver Springs Shores allocation point. The
The C P site in Jacksonville will provide a city grade signal over Middleburg with the
new antenna located on a tall tower WGNE already owns.

If you have any questions concerning the engineering you may contact me directly at.
904 908 0119. Thank you

Respectfully,

A handwritten signature in cursive script, appearing to read "Barry Magrill".
